### **Rural Precision & Machine (RPM) Relies on Okamoto**

Since its creation in 1999, Rural Precision & Machine (RPM) has been a strong Okamoto and Hartwig customer. When Monty Billingsley and David Hill started their company, their goal was to supply customers' high precision, high quality, with superior delivery and customer service. Monty and David have furthered this goal with their shop equipment purchasing philosophy. A new Okamoto OGM 8X20 OD grinder was one of the first pieces of equipment purchased. The control on this machine allows for a (3) step part program.

Last year David and Monty visited the Okamoto Chicago showroom and added a new OGM-12X36 UNCB grinder to their equipment list. David especially likes the Micro Fine tailstock adjustment on this model. "This machine is fully CNC capable and has exceptional rigidity and accuracy. According to David, many of the tooling components they produce have only one-ten thousandths (0.0001) total diameter tolerance. We have found that 30% of our products pass through one of our Okamoto grinding cells."

David and Monty's decision to place Okamoto on their manufacturing team have contributed in part to their success.
